Total # of supportive staff members who have tested positive COVID-19	0
% Support Staff Vaccinated	tbd

Definitions used in the above table:

Positive case is when a resident tested for COVID-19 and the result is positive. Positive case numbers will be presented as cumulative numbers daily.

Active case is when a resident was tested positive and the result remains positive.

Recovered case is the case of those individuals who tested positive for COVID-19 and passed the 11-day mark and is no longer infectious.

We are working with our community partner Unity Health to access further support in our fight to control the spread of COVID.
